Jay -

New versions of the Willamette River watershed databases have been posted to the NOAA FTP server. The files are located in the folder named -
non-responsive

There are 3 new files which have been uploaded -

non-responsive

non-responsive

non-responsive

These data have been updated to work with the latest dictionary tables from Dict101109.zip.

The update includes 593 new summed values for 37 existing samples for surface sediment samples. These data were added from the spreadsheet 2010-11-08_BioassayStationSums_NonBERA.xls provided by Kim Goffman of Windward on 11/8/10. The data have been given the QMID sequence codes of S01025317 to S01025909.

Dan/Rob - Peggy Myre plans to append the Osprey data shortly, so I you may want to hold off on the distribution of the database until these other results are appended.

Thanks,
Corinne
